

=11 RAD (Rapid application model)

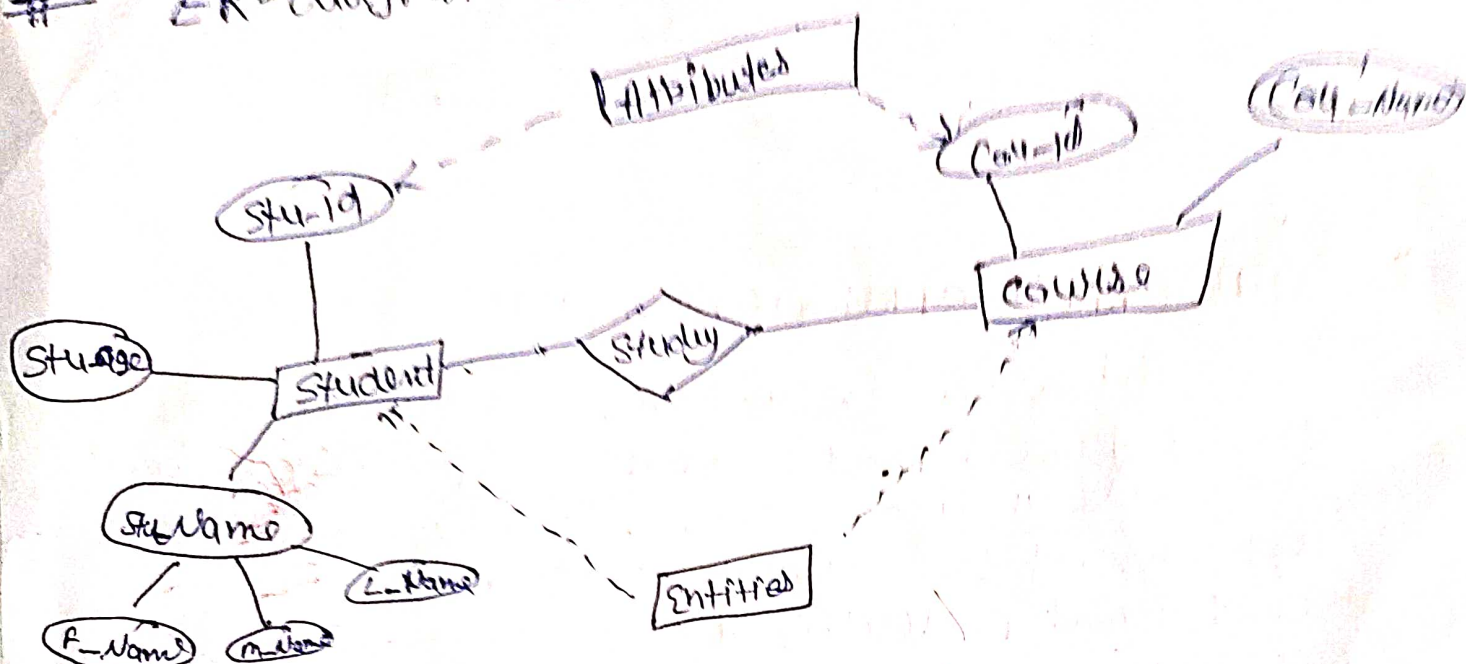

RAD is a Linear Sequential SW development model process model that emphasize developed cycle using an element based construction approach. if the requirement are well understood & described & the project scope is a constraints, the RAD process enables a development team to create a fully functional system within a concise time periods.

In RAD model product is developed faster & higher quality, through.

- Gathering requirements using workshop or focus groups
- Prototyping and ~~test~~ early iterative user testing of design
- A Rapidly Paced schedule that defers design improvement to the next production
- less formality in review & other team communication
